### NOTES

Residents also participate in monthly care management and advanced care team meetings. Staffing in an Allina Health Community Pharmacy takes place in the fall. In December/January, residents participate in a formulary rotation for 2 weeks and will not be in clinic. Residents also have the opportunity for various elective learning experiences, which typically occur in the spring. Schedules are set by the preceptors for those learning experiences. During clinic days we see patients in clinic, over the phone, via virtual visit or in their homes.
