## College of Pharmacy

### **Policy on Deferral of Admission**

The College of Pharmacy does not defer admission of admitted students to the following year under normal circumstances.

Admitted students, can, however, request a deferral of admission. The request should be made using an online form, and include the reasons for the request along with accompanying documentation.

When evaluating a deferral request, the college will consider the following situations:

- Documented Illness
- Family emergency
- Financial difficulties
- Extraordinary learning or service opportunities

Applicants who are granted a deferral will matriculate on the same campus in which they were admitted. A deferral is rescinded if the applicant reapplies to the College of Pharmacy.

The tuition deposit must be submitted to hold a seat in the program upon approval of deferral. Tuition deposits are non-refundable in the event the deferral request is not approved.
